Ved Kruthanth

Senior Android Engineer
ved.kruthanth@example.com | Bengaluru, India

Summary

Android engineer who builds apps that keep working when the network does not, and who likes handing a codebase on in better shape.

Experience

Senior Android Engineer, Tidal Apps (2025 - Present)

- Set up Gradle build caching that shortened CI builds by 45%
- Shipped a tablet layout for the inventory app used in 200 stores

Senior Android Engineer, Brightfield Labs (2018 - 2025)

- Built an offline-first sync layer with Room and WorkManager so field agents could keep working with no network
- Wrote conflict-resolution rules for local and server edits, cutting duplicate-record bugs by 73%
- Cut cold start time from 3.7 s to 1.1 s by deferring initialization and moving work off the main thread
- Removed dropped frames on low-end devices by flattening layouts and profiling with Perfetto
- Mentored 10 junior engineers through weekly code reviews and pairing sessions
- Wrote the onboarding guide and ran a two-week technical onboarding for each new hire

Skills

Kotlin, Jetpack, Room, WorkManager, Coroutines, Perfetto, Gradle

Education

B.Tech, Computer Science, 2017
